Assessor Comments	Very well bred line of NSM Merino ewe lambs that are July/Aug 2025 drop and in fresh forward store to forward condition. Ewes are well grown and a direct result of a fantastic season. Hazeldene blood for 25 years with recent introduction of poll genetics. Romani ewes are known for their wool cut, high growth and fertility. Ideal to shear and put on feed to grow out for joining. Some slight variation in size and type reflecting the classed-out group however likely later drop types. In mature ewes up to 140% lambing percentages achieved. Of sample assessed evidence of very mild dermo(off skin) in around 3%. Ewes to be offered in two lots and will be delivered by way of drafting gate to ensure evenness if required. Please note current excellent season causing some scald and some ewes may present soft in the feet. Common for their location. Please call for further information
