Assessor Comments	A quality line of very well-bred FUTURE BREEDER EWES based off Hill Padua MPM bloodlines. These plain bodied, fertile young ewes are on a rising plain with plenty of growth and maturity ahead of them. These young ewes have nearly all been Genomic tested and ASBV measured (small number have replacement tag). ASBV's for this line include indexes of ML 129.52, MP+ 133.94. Other notable averages for this line include YFAT 1.21, YEMD 2.16, YSL 14.82, CS 0.33, YFD -.0.22. This large line of FUTURE BREEDERS provides a great opportunity for either merino, first cross or prime lamb producers or non-mulesed flock restockers. This flock consistently averages over 115% lambing with mature ewes this year averaging up to 140% lambing unscanned. Vendor consistently turns off wether lambs lamb in the 23-26kg carcase weight range off stubble or in feedlot while also producing top quality wools (Elders WA Clip of Sale Award Winners F20 11-11-2025). Highly recommended line of ewes that put the Multi Purpose in Multi Purpose Merino
