Ext. Breed: Pure Poll Merino ewes

Age: 16 - 17 Months
Age Breakup: dropped over an 8 week period

Dentition (20 Mouthed)

Lamb	4 Head
2T	16 Head
Lambs with incisors erupted but not In Wear:	Most ewes mouthed were hoggets with the remaining lambs they had either lost a tooth or had permanent incisors coming up but not in use. I would imagine there will be less lambs at delivery.

Yield	Year 2026 Result 70.4 %
Shedding Breed Contact	No known contact with shedding breeds
Skin Comment	Good clean healthy pink skins. Any shearing cuts seem to have healed and ewes are doing well.
Wool Comment	Wool is a little short to make a full assessment of it. But for the wool there it is a clean white bright staple with plenty of nourishment and a bold gutsy crimp.

Vendor Bred	Yes
Stock History	Bred out of a classed self-replacing Merino flock using Weealla Poll on-property auction rams. Ewes are classed annually by Stuart McBurnie. Flock is selected for heavy cutting sheep while maintaining a good productive skin that and good fertility.

Assessor Comments	On offer is aa quality line of young Poll Merino ewes with 60 years of breeding Polls behind them. These ewes rarely hit the open market as they have been sold to a repeat buyer for a number of years now. 16-17 months old, Aug shn, mlsd, NSM, dipped and Vacc. All the work is done before they are joined to the ram of your choice. The vendor selects sheep with good body depth that are well covered with a bright white gutsy wool with good nourishment. Adult flock cut 6.6kg of 19.3mic fleece and marked 111% of lambs. Ewes have gone ahead in leaps and bounds since shearing. Noticed 3 ewes with scurs due to throw back to horn genetics in Poll Merino rams. Ewes will continue to grow out nicely if given the opportunity as the older ewes come in at approx 70kg avg. A great opportunity to get into some well-bred Poll Merino ewes. At assessment ewes had a weight range of 44-64kg to avg 52.9kg. Quality ewes with plenty of years in front of them.
