Assessor Comments	Offering 150 scanned empty Composite ewe lambs. Based on Kiranda & Karrawarra genetics, they aim to breed robust sheep with a mature ewe weight of 70-75kg capable of weaning 160-180% of lambs. They all had to opportunity for a 5 week joining earlier in the year & were then scanned empty. They were all rescanned the day after assessment to guarantee they are all empty & ready to join to the ram of your choice. Ewes were OJD & Scabby Mouth vaccinated at marking & received a Flexol (precaution only) & Cydectin Long Acting back in July. A wonderful opportunity to purchase impeccably well bred young ewes with a reputation for productivity & longevity! **Please note that there is two shearing in these ewes, approx. 4 weeks apart. Ewes will be reserved at \$280 & will not be sold prior to auction! Vendor also has another 560 of the top draft in this sale.
