Notable Traits

	Traits
1 Head	Appeared to have old signs of wool falling out shown in video, ewe was fit and healthy at assessment

Assessor Comments	On offer are 215 x NSM Vendor bred, Yarrawonga Blood, Surplus Maiden Ewe Hoggets. Yamagalli AI from top Yarrawonga sires, ensuring a strong breeding foundation, with their main breeding selection focused on a modern-day dual-purpose Merino. Selecting quality sires to maximise returns on both meat and wool, the breeding program focuses on high growth rates, post-weaning weights, and good fat carcass qualities, with a strong emphasis on heavy-cutting fine-micron wool. These ewes are carrying just under eight months' worth of wool and have been crutched, presenting ready to go. They offer excellent wool-cutting potential and a strong wool return. A genuine opportunity to secure quality line of young ewes, which have originated from a closed flock and a well-managed operation, with only terminal rams purchased into the operation each year. Highly recommended. Please call for any further details.
