Excellent	80%	Plain	60%
Very Good	20%	Light	40%

Assessor Comments	2 lines of unjoined May/June drop ewes, middle aged, this line of 580 are 2-5 years of age as at M/J of this year. Proven breeders, Poll & Horned bloodlines direct account of Haddon Rig P/L Warren. Ideal ewes to add to a merino operation or as terminal lamb mothers for the lamb trade. These ewes have all raised & weaned lambs and are now surplus to requirements. Haddon Rig's mission is to breed productive, fertile and high-yielding merino sheep of exceptional quality that will perform consistently for their clients. Haddon Rig have achieved this through selective breeding from Haddon Rig genetics, utilising industry best practice in nutrition and husbandry and combining ASBV data with professional classing. These ewes averaged 67.3kg at assessment. Ewes present very well for breed and condition and are in optimum joining condition and weight. Will load a comfortable b-double of ewes for successful purchaser. 1 line of 210 older sisters in same sale. Highly recommended line of ewes.
