Assessor Comments	A very neat small line of 1st x ewe hoggets, well bred with very good structure. A very good start-up line for the new producer, or a handy addition to any existing flock. June/July 2025 drop, with a small tail drafted out. They are surplus to requirements. October shorn, and no opportunity to rams. Ready to take the ram of your choice. They will present as good medium to large frames for age, in very good forward store to forward condition. The vendor has been breeding 1st x cross ewes for over 20 years, and is very proud of the product that is the end result. Please note: the vendor is prepared to deliver within a 200 km radius in his own truck. Also note, delivery to be postponed until the following week, with a 5 day span, due to time constraints because of shearing taking place that week.
