|                        | Steers have had very limited handling throughout their lifetime. Initially cattle were flighty however the more they were handled the more they settled. Given time and correct handling I think they should improve drastically                                                                                                                                                                                                                                                                                                    |                                           |                                     |

| Assessor Comments      | Buyers a very good line of Murray Grey steer weaners averaging 243kg. These 9–10-month-old calves were weaned approximately three weeks ago so are ready to go ahead with minimal work. They present with good frame and length, and are displaying shape, type and bone. Going forward, they should continue to develop into well finished yearlings suitable for all grassfed markets being Greenhams NE acc and NG/NA Note: All steer calves were marked approximately 4 weeks ago, some calves are still showing signs of this. |                                           |                                     |
