Assessor Comments	Presenting a small but neat line of PTIC Heifers on behalf of Yopies Pty Ltd of Hansonville. Heifers are only being offered due to high pregnancy rates in the herd and these are surplus to requirements. Vendor has utilised a cell grazing system with the herd meaning these cattle have been handled regularly emphasising a quiet temperament. Heifers are sired by a Belmont Red bull out of an Angus cow heard and are joined back in calf to a Seifert Belmont Red bull to commence calving in August. A good article to take on and add to an existing cow herd. Please see photos for full satisfaction. Pregnancy Test Certificate available.
