Assessor Comments	A herd dispersal of good quality moderate framed coastal bred cows, with a good percentage of younger cows in the herd. Continuously running with a Brangus bull. Cows have been vet pregnancy tested (see notes for results) for buyer confidence. Good percentage of calves (19) at foot at assessment. Hard to find a genuine run of breeders like these on the coast. Cows were good to handle in yards and yarded easily. Please note polled to dehorned not noted at assessment only scurred recorded. Animal welfare standards will be adhered to upon delivery taking into account the continuous joining.
