Assessor Comments	An ideal opportunity to purchase a quality line of 42x43 station mated angus cows and calves in account of TK Agriculture. Cows are in store condition and averaged 523.6kgs at assessment and are doing a great job of their calves at foot. Both cows and calves have recently received all of their annual treatments with the calves being marked and fully vaccinated. Please note calves tagged with orange management tags are heifers and with no tags are steers. One cow and calf observed to have brown coloured coat as pictured and cow Tag 151 has twins. An ideal unit to take into the spring with confidence, fresh calves at foot and re joined cows in the prime of their life.
