Assessor Comments	An outstanding draft of EU accredited Angus cows, coming up on their 2nd - 6th calf. More than half of this mob are carrying their 2nd & 3rd calf. The Moormook cow herd is predominately based on Coolana, Bardwidgee & Pathfinder genetics with bulls more recently being purchased from Rennylea. Cows were joined to Rennylea bulls from 10th November to 8th October but have been pregnancy tested to calve during the last 3 weeks (20th Sept to 8th Oct). This represents a brilliant opportunity to secure high quality Angus genetics from one of the Western Districts top herds! Cows all present in strong forward condition. **Buyers please consider that these cows are very heavy & getting close to the point of calving when making travel arrangements!
