| Handled With           | The hfrs were easy to handle throughout the yards. They walked through the round yard and up the race with no fuss.<br>Bikes , Vehicles                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                 |                                     |            |
| Assessor Comments      | 22 PTIC Angus hfrs. 422kg full and all frame. HMPF have been using Rennylea genetics for the past 8 years. Every year the operation joins hfrs for 9 weeks, at preg testing they are split, everything calving in the first 6 weeks is retained, and all hfrs calving in the last 3 weeks is sold. So at preg testing these hfrs would show joining dates of approx 30/Dec to 20th Jan (approx calving 10/10 for 21 days). All hfrs will be preg tested again prior to delivery. The hfrs have been well managed so they dont get overweight leading up to calving, they have cover but not fat. Their temperament was great and were easy to handle. One hfrs had some white on her udder and one has a bit of an orangey coat (which could be fixed with supplements). Great hfrs with plenty of breeding behind them. |                 |                                     |            |
