Assessor Comments	A nice line of well bred, one-mark PTIC Angus heifers in calf to their second calf, by the TeMania Angus bulls. These young cows are predominantly medium frame with the exception of one smaller framed cow, & are presenting in fresh condition, having had their first calves weaned off in June. These heifers are developing well, & are exhibiting good thickness & depth along with a good deal of stretch. Bred at Wallanbah NSW, from a self replacing herd, with genetics derived from KNOWLA, BOORAGUL & HEART Angus bloodlines, & a focus on early growth rates, which, when combined with the top quality TeMania sires used, should ensure some cracking Angus calves on the ground, their second time around. A great opportunity to secure a quality line of young Angus breeders coming into the height of their production. With prime old cows currently selling very well, & a favourable early outlook for Spring, they offer real value & an attractive change-over opportunity into younger PTIC breeders, with potentially change in your pocket.
