Comment on Fat Score 1 Cattle	Heifers are fit to travel up to 800 km from Kilterry in one lift. A 12 hour spell is recommended at 800 km. Best transport practices encouraged. Heifers were strong in yards at assessment however have light fat cover and are in store condition and would not recommend travelling further than 800km in 1 lift.

Assessor Comments	1 of 2 x B-double lines of PTIC Santa Heifers. Heifers are joined to Stud Santa sires from Waco, Brisbane Valley, Gyranda and Kilterry Grazing. Preg-tested by Non Vet Contractor at assessment Jana Saunders being mainly 4-6 months in calf however a small percentage of 2 month pregnant and heavier 7 month pregnancies where also detected. Heifers are in a light store condition with feed having turned in the last 60 days with low levels of protein, heifers had also been in the yards for 3 days at assessment and offer significant compensatory gains from assessed weights. heifers are ideal to take forward as future breeders or calve them out and trade as High quality Cow Calf units. Heifers are in a ticky area and had visible tick at assessment having been pre-treated with Iverlab Pour on the day before, vendor will give these heifers a second treatment prior to delivery and heifers would be hoped to clear on the first dip after this however no guarantees are made. 90% reds with a small percentage of composite type heifers being black or showing some Brindle/Tan.																								
Assessor	Ashley Naclerio (Level 1 Accredited) Phone: 0400 448 679																								
Delivery Period	28/08/2026 to 01/09/2026 (5 days)
