			Slightly Stirry: 1 head		
	Cattle have been running in a rotational grazing programe, cattle were good to handle in yards when splitting up calves to process				
Handled With	Bikes , On foot , Vehicles				
Notable Traits	Traits 1 Head OLD PINK EYE BLUE SCARING				
Assessor Comments	An outstanding opportunity to secure a quality line of well-bred Angus first-calving heifers with an excellent, even drop of Angus calves at foot. These young females are displaying good frame, capacity and maternal ability and present in good condition. Having come through challenging seasonal conditions in Victoria, the heifers are now beginning to clean up in the coat and move forward strongly as warmer weather and increased spring feed become available. With their calves now established at foot, these heifers offer purchasers an excellent opportunity to add weight and value quickly as seasonal conditions improve. The heifers are Merridale blood, providing a strong and proven Angus genetic base. They display well-developed udders with plenty of milk and are doing a terrific job on their calves. The calves are a particularly impressive feature of this offering — very even, sappy and showing excellent weight for age, reflecting both the maternal ability of the heifers and the quality of their breeding. Calves were unmarked at assessment and vaccinated at assessment.This provides an attractive opportunity to grow these quality young calves through and target future feeder or store markets. A genuine quality young Angus cow-and-calf package with plenty of upside ahead of them. The combination of Merridale genetics, strong-framed first-calving females, excellent udders and an even, predominantly steer calf drop should appeal to purchasers looking for young replacement breeders
