Assessor Comments	An excellent line of Angus heifers & calves. These heifers show good frame and type. They calved out over a 5 week period making a nice even line of calves. The calves are sired by excellent quality Reiland Angus bulls (bull info attached in photos). The calves were marked at assessment & all units are individually identified. These heifers have a great genetic background coming directly from Milong's commercial herd and will mature into Medium/large frame Angus cows producing high quality progeny for many years to come.
