Handled With	Bikes , On foot

Notable Traits

	Traits
1 Head	Calf with white birthmark on the side -see photos

Assessor Comments	A smart line of well-grown, well-covered 2-year-old Rennylea Blood Angus heifers with Ireland Angus calves at foot. All heifers calved unassisted and are proving themselves to be capable young mothers. The strength of the Rennylea genetics is clearly evident throughout this offering, with the heifers doing an outstanding job rearing their calves while maintaining excellent condition themselves. They display plenty of maternal ability, capacity and productivity without compromising their own performance. Heifers present with good, clean feet and sound udders, demonstrating strong milking ability (note: 5 heifers with partially white udders). Whether you're looking to strengthen an existing breeding program or establish a quality foundation herd, these females offer proven bloodlines and outstanding future breeding potential. An attractive opportunity to secure well-bred, productive units that are ready to be joined to the bull of your choice.
