Assessor Comments	20 x 21 - Representing 50% of the 2024 winter drop vendor bred Angus x Angus heifers with their first calf at foot. These heifers have averaged 580kg and calves have averaged 80kg full. They will mature into medium-large frames cows with shape and structure present. They are classed breeders of the 2024 drop having all conceived from a natural joining and represent the heifers that calved on the second cycle and being sold due to sufficient numbers. Calves were marked and vaccinated at assessment with 11 steers and 10 heifers total. Presenting even as a line and will be ideal for anyone looking to start or add to their herd. The dams carry Moogenilla and Crawfords Angus genetics and the calves have been sired by K.O Bulls. These heifers are starting to clean up in the coat and are doing a terrific job on their calves. These units come highly recommended and should you require any further information please call.
