Assessor Comments	HERD DISPERSAL A nice quality line of 2nd calvers These cows show great growth bone and confirmation and given the right opportunity will grow into moderate to large frame cows. Cows are doing a great job and there calves. Cows originate from a Droughtmaster herd ex Mardie Station WA very reputable for milk and carcass quality and also some Angus cows bought in. Vendor has been putting Angus bulls over Droughtmaster cows and progeny to breed a flat back animal still with a bit of cross to handle all conditions and be raised on grass without having a grain assist to finish cattle for feedlot or MSA kills. Calf at foot sired by Pharo Angus Bulls. Please note vendor has 3 others lots in sale. 2 on same property 1 at Somerton 110km south
