Assessor Comments	A lovely line of large frame Cows (AVG 601.3kg), with plenty of capacity, doing a fantastic job on their calves considering the season. The calves are all sired by a DSK ANGUS Bull and present in fresh, healthy condition. The uneven ratio of cows to calves, I can only assume, is due to some cows having both a weaner and calf milking off them. Therefore, presented is 50 x 57 Cows and Calves. Please note: Seasonal fly rub was noticed on a handful of cows. One cow with an old blue eye. One cow with an old grass seed wound on neck, assessed by vet and and deemed non detrimental to health. One calf with active pink eye, four calves with mild pink eye - all treated at assessment and will be reassessed at delivery. One calf with a cauliflower ear from tagging.
