Assessor Comments	A good quality line of NSM Angus & Angus/Santa cross cows, with very attractive shapey calves at foot. These cows were purchased as part of a larger line of cows sourced through saleyards in the Central Tablelands & Central West of NSW, in store condition earlier in the year, to utilise surplus feed & forage crop silage, & add value by fattening. This mob represents an Angus line that calved out in the process of fattening. These cows appear to be well bred for the most part, exhibiting good to large frame along with good body length & shape & are presenting in fresh condition whilst maintaining a quality line of Angus sired calves. The marked calves at foot are sappy, & displaying very good carcass shape & softness, & despite unknown bloodlines, they are all exhibiting a high degree of breeding, which can be affirmed by their early weight for age gains. All cows were mouthed at assessment with 12 out of the 13 cows displaying very fresh middle aged teeth, with only one cow presenting as past her prime with a full compliment of very worn down teeth. Ideal units to short term trade whilst good fattening feed is available, by growing the calves further in the coming months, & fattening the cows into heavy weights before splitting, or alternatively, re-join & retain as a handy line of breeders with plenty of years production remaining, by classing out the single older cow.
