Assessor Comments: One mark Angus x Angus cows with their second calf at foot. They were sourced direct the breeder DF Bell - Armidale and were only being sold due to the northern seasonal conditions. They are Glenavon Angus blood and this line represents the cows that have calved early in the calving period. These cows have turned inside out since arriving in the autumn and stand on a solid medium frame weighing 508-650kg to av 548kg curfewed and are not at their full potential. They are soft coated, moderately boned and were easy to handle through the assessment process. The are giving everything to their calves. Calves are currently not marked but can be marked at buyers request. Due to not all mothering up at assessment determining the sex split of the calves wasn't possible. Young mothers with a full productive life ahead of them these cows are suitable to start a herd or add to an existing herd. Please note extended delivery to allow the youngest calves time to strengthen. Should you require any further information please call.
