Bikes , Dogs , On foot , Vehicles

Notable Traits

Traits

5 Head Light rubbing from lice.

5 Head Light scarring - pink eye

Assessor Comments

A good line of 28 x August/ September 2025 Drop Angus heifers. Weaned and educated in early April. Rennyalea blood, the heifers are in good health, currently grazing wheat, this group is averaging 1.3 kg/ day over a 21-day period. A sound group of heifers that are suitable for backgrounding and will perform very well on feed. The heifers are good to handle and will continue to grow if given the opportunity on pasture or crop. Buyers can take the opportunity to buy healthy weaned heifers of quality breeding and proven performance. The heifers are just starting to clean up their coat and will tidy up with warmth and sunshine. Ellendon places selection emphasis on above average growth, carcase and IMF EBVS.
