Notable Traits	Traits			
	1 Head Minor old eye scarring (ref photo)			
	4 Head Minor old ring worm patches around head			
Assessor Comments	Quality line of vendor-bred Angus steers. The vendor has been using the highest-quality Reiland Angus genetics available in the herd for the past 28 years, with a strong focus on growth, positive fats, and temperament. These steers are an excellent reflection of the breeding program. The Mount Hugel cattle have a proven history of performing exceptionally well on feed and are highly sought after by repeat feedlot buyers. These steers have received all required health treatments and are now starting to power ahead, recently recording an impressive average daily gain (ADG) of 2.0 kg/day. Given the right opportunity, these steers are expected to excel for the successful purchaser. The Mount Hugel herd is regarded as one of the leading Angus herds in the Adelong district, making this a genuine opportunity to secure a quality line of cattle.
