Notable Traits	Traits 7 Head Ringworm 1 Head Wart 20 Head Winter Lice		
Assessor Comments	Buyers, presented to the market is 95 Angus steers. Steers were weighed out 300kgs and better at assessment averaging 340kgs. Steers are currently running on native & improved dried pastures and would jump away on a crop or fresh feed. Vendor normally grows out their steers but due to the season tightening they have been presented to the market. Please be aware of approximate number of traits, as a portion of these steers have winter lice rub marks, ringworm or wart. An article of steers with breeding behind them and a solid amount of compensatory weight gain given the right feed. Buyers I did also remove a tail before the assessment.
