	Since weaning these heifers have regularly been through the yards and their handling has improved each time. They moved through the yards efficiently during the assessment process. Some heifers were flighty when applying pressure to move them between pens in the yards. All heifers stood calmly while being photographed. They will benefit from additional education.		
Handled With	Bikes , Dogs		
Notable Traits	Traits 3 Head Pink eye scaring (faint in 1 eye only) 15 Head ringworm scars		
Assessor Comments	Offered is an exceptional line of 122 weaned Angus heifers. These Mundarra Blood calves are 10-11 months old and were weaned back in April. Presenting in fresh forward condition they've been performing well throughout a mild tablelands winter. Weighted out over 240kgs at assessment to put together a very even lot of one-mark heifers. The Parfett family have been breeding Angus cattle for over 60 years with the no expense spared on selected genetics within the herd. These heifers will make suitable future breeders for the most fastidious operation. Buyers can expect them to mature into moderate to large framed fertile females.
