	The heifers handle well and are educated at weaning. They do have a tendency to rush gateways if given the opportunity. A good induction and further education will see them settle as a group.			
Handled With	Bikes , Vehicles			
Notable Traits	Traits 6 Head Eye scarring - healed.			
Assessor Comments	A very good group of 70 x NSM August/ September 2025 Drop Heifers. This group of quality females represent the lead of the Ballymena 2025 drop, having already sold surplus heifers earlier in the season. The heifers are by Rennyalea and Bannaby sires out of Rennyalea and Bannaby blood females. They have performed well on crop throughout late autumn and early winter. Ballymena undertake a rigorous animal health program; the heifers are in excellent shape. They present well as a group, with good muscling and coats, a great opportunity to purchase well bred future breeders for joining, or heifers to background for feedlot entry or to finish for the trade. These heifers are the 'tops of the drop', no heifers have been retained. There are plenty of heifers on the market, however not many are the lead draft.
