Assessor Comments	A quality line of well grown EU accredited Angus Weaner Steers presenting in a strong forward store condition. These steers have good breed purity, depth of body and structural soundness. Having been given the full complement of health treatments such as a first and second dose of UltraVac 5 in 1 and a Dectomax Pour On at weaning, they are well positioned for continued rapid growth. They are an ideal opportunity for those looking to grow them out to heavy feeder weights or grass finishers. Several cattle are showing signs of rubbing on the neck and shoulder (as pictured), with associated hair loss and skin thickening evident. Please note this vendor also has a sister line of 43 Heifers available.
