Assessor Comments	Top quality line of Angus heifers Sept/Oct drop. Bred from a herd of well regarded Rennylea genetics. Heifers come from a well managed local herd and carry a clean bill of health. 259-360kg at assessment they represent the second line of females for the drop. Ideal opportunity to acquire a large single line with opportunity to further class these females for a spring join if desired. Visual tail removed pre assessment. Heifers range from fresh store to forward store condition. Cattle are proven performers amongst previous purchasers with very good feedback. Please call for further information.
