	Slightly Stirry: 39 head		Slightly Stirry: 39 head		Paddock	
	Stirry: 5 head		Stirry: 10 head			
	These Steers ran into the yard well. A few did not settle in the yards straight away and were a bit stirry first up, more trying to get away from you rather than take you on. They do have a tendency to rush when handled but settle once back in the mob. They walked out back to the paddock well . To be fair we ran them in and started the assessing process straight away. The odd one played up in the crush , nothing unusual there. Overall Steers that are easy handled by experienced operators.					
Handled With	Bikes , Vehicles					
Notable Traits	Traits					
	2 Head Slight cloudy eye from old pink eye infection.					
Assessor Comments	A tidy line of 84 Millah Murrah blood Steers that are going forward and are the ideal feeder weight they will finish well on grain or grass. This is the lead of 250 steers. As you can see by the videos they have the frame , conformation and muscle pattern you would expect from the Millah Murrah blood lines. The breeder has selected bulls on type not price and this shows through. A couple have a slightly cloudy eye from old pink eye infection. Several have been rubbing which is a combination of reaction to the hay feeders and the change of season. There is another lot of Heifers from this breeder also in this sale. Inspections prior to sale welcome.					
Assessor	Anthony Atkinson (Level 1 Accredited) Phone: 0412 777 700
