Assessor Comments	Good quality line of Angus & Angus X Steers, that are grass-fed accredited and the younger group that are showing good growth and frame for age. These steers are Rennylea, Thompsons and Kunuma bloodlines with vendor selecting sires based on marbling, milk and fertility in herd. Being out of medium to large frame cows, these steers are the ideal feeder article that will respond well to grow out to large trade or export cattle. Yard weaned for 7 days on hay and currently running on crop. Small tail removed to keep an even group of good young steers.
