Notable Traits	Traits 4 Head Old pink eye scarring - not detrimental - refer photo of worst affected.		
Assessor Comments	Annual offering of the surplus to requirements August/September 2025 drop L and J Lewington poll Hereford heifers. They represent the bottoms of the drop and were classed out on weight alone. These heifers are starting to shine in the coat and although starting to lay fat cover they are not overdone. They present even as a line and have plenty of stand up to take onto heavy export kill weights if required. Presenting the heaviest they have been in a few years due to the exceptional start to the 2026 season and having not had a set back. They were weighed from 250-352kg after a decent curfew and after having been through the crush 3 times for the day to sort them. As a complete line of mixed sex yearlings they have been averaging around 1kg/hd/day over the last month. They are receiving wheaten hay and have been supplemented Lead up but appear to have had sufficient. Top quality heifers that will be ideal to value add for a trade as breeders or for future kill markets given the position of the spring. Please note vendor is offering their steers in today's sale also.
