Joining Details	Not Station Mated		
Any Access To Bulls or Stags?	To vendor's best knowledge, this lot has had no access to bulls or stags.		
Temperament	Yards	Crush	Paddock
	Quiet: 112 head Slightly Stirry: 5 head	Quiet: 110 head Slightly Stirry: 7 head	Temperament not assessed in Paddock
	These weaners responded well to pressure and have had some education following arrival. The odd heifer was slightly quick when coming into the round yard for drafting - typical of weaners. Following being handled they settled as normal: Some problem heifers were removed as a result of temperament. Refer video for when the weaners were settled with space.		
Handled With	Bikes , Dogs , Vehicles		
Notable Traits	Traits 6 Head Blemish on eye not detrimental to vision - old scaring. 10 Head Minor wort - appears to be clearing. 12 Head Ring worm - concentrated around the neck area. 6 Head Showing some navel. 8 Head White marking on belly.		
Assessor Comments	Offering a b-double load of Angus and Angus cross heifer weaners. They have been rotationally grazing in a larger mob and have been broken with dogs. These heifers have been taught respect and as a result are responsive to pressure but relaxed when pressure is released. Currently grazing fresh ryegrass with clover present and the feed is starting to move as the weather warms. 100% weighed from 220-345kg after a few hours off feed and after being drafted and sexed for assessing. Only selling to make room for younger/lighter weaners as well as point of calving cows. These weaners were sourced from northern NSW and into southern QLD. They are visably on the do with their coats starting to shine and represent the tops of the draft. Now they are acclimatised and given ample nutrition they offer immediate and continued compensatory weight gains. A decent run of heifers that present well as a line.		
Assessor	Henry Booth (Level 1 Accredited) Assessor declares a conflict of interest in this lot		
Delivery Period	14/09/2026 to 18/09/2026 (5 days)
