| Handled With           | Very quiet young steers. All bucket reared, extensively handled. Very quiet to deal with in the yards, push them around by hand. All led up the race well, bar the odd steer that turned around in the race. Quiet to walk amongst in the large yards for photos. Quiet, well weaned steers that could be handled by a stock person of any experience.                                                                                                                                                     |                |                                     |

| Assessor Comments      | Quality line of young, well started steers. All bred by the vendor, bucket reared for an extended period, weaned on to pellets, then brought over to the feedlot to be started on a grain ration. Had every animal health treatment thrown at them to give them the best start and are really going ahead now and showing good daily weight gain. An ideal line of steers to continue on a feed ration and target a domestic or export market. Buyers please Note. Vendor has another 2 lots in same sale. |                |                                     |
