Assessor Comments

A good opportunity to secure a line of 70 Angus light feeders to continue onto heavier feeders or export types. These Steers were vaccinated with Bovilis and all weighed 349kg plus full at assessment. Purchased from only two vendors out of the SELX Weaner Sale in April as vendor bred calves, they are showing good growth and frame for age and have been running on native pastures, with Phalaris and sub clover and would respond extremely well to good feed going forward. Only being sold due to calves hitting the ground and making room. Please note: 2 steers with cloudy eye, small % with old ringworm scarring and 1 steer with white on belly, all deemed not detrimental to sale.
