Assessor Comments: NSM Angus x Angus heifers weighed 343-499kg on a full weight to average 392kg with a delivery adjustment. These heifers are acclimatised with all treatments up to date and are stacking the weight on. They are grazing on annual ryegrass based pastures with clover present and quality food on offer as the season begins to turn. They were purchased in to graze excess winter feed and are being sold to make room for vendors breeders. Ideal to background/feedlot for strong kill markets. These heifers will be preg tested empty prior to delivery for buyer reassurance. Quality Angus heifers that represent the tops of the draft. Please note vendor is offering other heifers off the same property in today's sale.
