13	110.1 -130.0	245-289	46%	5%	**51%**
15	130.1 -150.0	289-333	7%	28%	**35%**
Totals			**67%**	**33%**	**100%**

Vendor Bred: No
Vendor has owned stock for 2-6 months

Stock History: Purchased in light weight weaner cattle to put some weight on.

Lifetime Traceable: Unknown

Grazing Conditions: Currently grazing relatively short but fresh ryegrass based pastures with clover present and still providing plenty of value.
Returned same

Burr/Seed in Coat: No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status: The owner declares that the cattle have not been treated with HGP at any period of their lives

Health Treatments

Drenched	10/06/2026	Iverlab Plus	
Vaccinated	10/06/2026	5 in 1	First Dose

Temperament	Yards	Crush	Paddock
	Quiet: 56 head Slightly Stirry: 2 head	Quiet: 54 head Slightly Stirry: 4 head	Temperament not assessed in Paddock

These weaners responded well to pressure and have had some education following arrival. The odd steer was slightly quick when coming into the round yard for drafting - typical of weaners. Following being handled they settled as normal. Refer video for when the weaners were settled with space.

Handled With: Bikes , Dogs , Vehicles

Notable Traits

	Traits
1 Head	Blemish on eye not detrimental to vision - old scaring.
7 Head	Half tail - will not affect performance.
7 Head	Minor wort - concentrated to face/upper neck.
8 Head	Ring worm - concentrated around the face/neck area.
2 Head	Weeping eye treated at assessment.

Assessor Comments: Offering a light 2 decks of Angus steer weaners. They have been rotationally grazing winter based pastures and have been broken with dogs. These steers have been taught respect and as a result are responsive to pressure but relaxed when pressure is released. Currently grazing fresh ryegrass with clover present and still growing due to recent timely rain. 100% weighed from 205-323kg after a few hours off feed and a walk to the yards. These weaners were sourced from northern NSW and into southern QLD. Breed content is an estimate and please refer video to make your own judgement in relation to likely crosses. Majority are angus and black badly with the balance being an Angus cross. They are visibly on the do with their coats starting to shine and just starting to lay some fat cover. Now they are acclimatised and given ample nutrition they offer continued compensatory weight gains. Soft coated Angus cross steer weaners that are just starting to fully appreciate spring.
