Comment on Fat Score 1 Cattle Cattle are all in good fresh store condition

Vendor Bred No
 Vendor has owned stock for 6-12 months
 Stock History Purchased ex Winton & Charters Towers last September

Grazing Conditions typical improved southern tablelands pastures - phalaris, cocksfoot, ryegrass & clovers - improving after recent rains.
 Returned same

Burr/Seed in Coat No Burr or Seed of weeds declared noxious observed in the coats at assessment

HGP Status The owner declares that the cattle have not been treated with HGP at any period of their lives
 Health Treatments Vaccinated 01/05/2021 Ultravac 7in1

Joining Details Station Mated bulls put in: 01/12/2020 bulls taken out: 10/05/2021 (161 days)
 Bull Breed(s): Registered Angus

	Bull IDs: Bongongo Angus Bulls To the vendors best knowledge, this lot has had no access to bulls or stags aside from stated joining period.		
Preg Tested?	Yes, this lot was pregnancy tested, by Tom Graham - Coolac Vet Clinic (Vet) on 01/05/2021. 36 Head (66.7%) PTIC, from 1.5 to 5 months (at time of assessment). Certificate Available.		
Other Joining Details	Bulls have run with cows since 01/12 and were taken out at assessment - every chance there are pregnancies that were not detectable at preg testing		
Temperament	Yards	Crush	Paddock
	Quiet: 35 head Slightly Stirry: 14 head Stirry: 5 head	Quiet: 30 head Slightly Stirry: 15 head Stirry: 9 head	Temperament not assessed in Paddock
	Generally a good mob of Brahman and Brahman X young cows to handle. Flowed through yards with reasonably little stress in trying conditions after recent rains. Odd cow stirred a little in the drafting process although nothing out of the ordinary and soon settled back into mob. As can be seen from the videos they are reasonably quiet mob outside the yards showed no real tendency to stir if handled correctly		
Handled With	Bikes , Dogs , On foot , Vehicles		
Assessor Comments	A good line of generally Brahman, Brahman X & Composite young breeders. Depastured continuously to Bongongo Angus bulls from the start of December and preg tested on the 1st of May. Bulls remained with cows until assessment on the 10th. One could safely assume a good number of the non detectable cows will be found in calf if retested in 6 weeks time. Cows were purchased as PTIC heifers ex Winton and Charters Towers last September as part of a larger, mixed breed line - see other lots in this sale - all calved at "Greendale" and the weaners off these cows were sold via Aplus several weeks ago. These were the earlier calving units and all raised a live calf. These are the are the most mixed of the three lines on offer breed wise with the highest % of content, however, plenty of frame and scope throughout. A decent line of young store cows to fatten on, calve and recycle next spring with an Angus X calf at foot if so desired.		
Assessor	Ben Redfern (Level 1 Accredited) Parallel Assessed By : Ben Emms		
Delivery Period	15/05/2021 to 21/05/2021 (7 days)
