Temperament not assessed in
Paddock

Crush set up was very loud & rattley, which definitely didn't help the more anxious females in the yards leading up to the crush. or in the crush itself, some jumping around and wanting to get away (listed as slightly stirry, although I think they can be forgiven considering circumstances) Prior to the weighing process starting, all females were very sensible in the back yards, when drafting up in to bloodlines. And they managed to settle themselves down once in the big yard to take photos.

Assessor Comments

Very nice line of long, roomy females that will mature in to solid matrons. Thick set women that still have nice feminine features and pretty faces. Good width between their eyes and a nice upright carriage. Females showing desirable attributes you look for when selecting breeders. Note. 4 Heifers presented with a minor white patch on their flank/belly. 1 Heifer presented with a small wart on her face, no larger than a 5c piece. Please see photos & video for full contentment.
