| Assessor Comments             | This is a line of 14 x 14 1st calving 3 year old heifers with Franc blood calves at foot. The heifers were bred by the vendor ex Pardoo and Langi Kal Kal blood cows, and have good frame potential. The vendor is an astute judge of breeding and genetics, and has sourced top quality females and sires when their operation began about 6 years ago. In this consignment there is one outlier calf at 263 kgs which calves early, with the balance of the calves being December/January drop calves around the 140kg mark. The calves have had their second 7 in 1 vaccine at assessment and are doing well with the heifers putting everything into their calves. |                                 |                                     |
