Comment on Fat Score 1 Cattle Heifers are fresh and healthy. Moving forward on a rising plane on nutrition and would handle long distance trucking with no concerns. Recommend a spell every 1000km. May require dipping at Julia Creek if crossing the tick line, therefor would require a spell the same day then onwards the following day recommended.

In the head bale when caught the majority showed some anxiety, no doubt created from pregnancy testing the last time heifers where in the yard. Outside the yards genuinely quiet and well educated heifers that handled well. Heifers where generally settled in the yards after processing in overhead race. Not pound drafted.
