	These Crossbred cows were drafted with no trouble through the round yard first then handled through the crush. Majority of cows were easy to handle, the more pressure you put on the mob only a small portion got worked up.				
Assessor Comments	A Tidy line of Mixed Aged Crossbred Cows PTIC 4-8 months to a Cobrabald Charolais bull. These Cows present in a fresh forward store/prime condition which is remarkable as they had 300+kg calves pulled of them @ assessment. These Cows have had a massive lock up as they have been in the yards and handled for the previous two days. The Genetics and the job the Cows produce through there calves is exceptional as the calves show a heavy influence to the Charolais breed as shown in the photos. Due to the rising weaner and Cow market this gives the intended purchaser numerous avenues to position themselves in a safe bet with all the hard work being done. The Calves will be in the (Eastern States Weaner sale) and the British Bred Preg tested Cows will be in the same sale (Eastern States Cattle sale).RARE OPPORTUNITY to purchase a good line of proven cows preg tested right up on the job to deliver quality off spring. Apart of "Mullengah" herd dispersal.
