Assessor Comments	A nice line of young heifers that were preg tested back on the 16th March 2021. All heifers that were detectable at that point were marked and are easily identified. Purple sheep tag in near side ear are 6 months plus, purple sheep tag off side ear are under 6 months and no sheep tag indicated that they either had a calf at foot or were undetectable but still running with angus bulls up until assessment. They were originally purchased as weaners out of SA where they had already had access to hereford bulls. Over 6 months are going to majority joined to herefords, with access to a Speckle Park bull for about 1 month (6-7 months in calf). Under 6 months should all be joined to the Goolagong Angus bulls only. All heifers that have calved already have done so with no assistance and have Hereford calves at foot.
