Assessor Comments	On offer is a nice line of 20 x PTIC Angus Heifers. The heifers present well as a group and are in good condition for calving later in the year. Due to a bull breakdown, the heifers have had an extended joining period. Some heifers were noted with a splash of white in front of the udder. Both bulls used in joining were positive for Calving ease and below breed average for birth weight. Heifers have been scanned and can be transferred to the successful purchaser at no cost for your convenience.
