Cattle moved freely through the yards, odd heifer a little stirry in the crush but settled quickly once they returned to the mob. They did like to rush through gates a little, but are easy to block up or slow down.

Assessor Comments

Quality PTIC Angus Heifers to begin calving early August for 6 weeks. Heifers averaged 498kg full (440-592kg) at assessment and are joined to a low birthweight bull (BWT +2.9), Ardrossan Magistrate P440- link attached. The Sykes cattle grow out to be medium to larger frame, deep bodied mature cows - a herd with a very good reputation. Please note; one with an old eye scar. This is a great opportunity to purchase a quality line of vendor bred PTIC heifers that are a genuine surplus sale - no heifers are being retained this year.
