Assessor Comments	Offering a draft of 24 PTIC EU Angus cows. PTIC to Landfall Angus bulls to commence calving around mid-August for 9 weeks. Cows are rising 7 years, present in principally forward store to prime condition and are moderately framed. All cows offered calved at two year old, and have reared a calf every year since. The Killara cattle are almost exclusively Landfall Angus blood (odd Coolana & Lawsons back in pedigree) with a focus on low to moderate birth, above average growth and carcase attributes and positive fats. This draft are offered due to vendor requirement to lighten off numbers, with these cows being the lead draft of this age group on this block, having had a tail removed. Terrific chance to acquire vendor bred, EU Acc PTIC Angus cows joined to calve in spring.
