Preg Scanned?	Yes, this lot was pregnancy scanned, by Bill Harris (Non-Vet Contractor on 06/05/2021). 100 % Scanned in Lamb, from 2 to 3 months (at time of assessment).		
Assessor Comments	400 - Vendor bred Merino ewes scanned in lamb to stud White Suffolk rams for a tight 46 day period. Ewes present in healthy store to forward store condition. Ewes have been shorn 3 weeks prior to assessment & have been grazing an annual oats crop since shearing and will remain on crop until delivery. At scanning a random sample of 100 ewes were scanned for multiples resulting with 12% being detected with multiples & the balance singles, please use as an estimation only. Ewes ages are indicative of the appropriate NLIS tag colour. Please note - the majority of the lighter weights recorded from the sample assessed were of the younger white tag ewes. Ewes are being offered for sale due to being surplus to requirements - presenting an opportunity to secure a line of vendor bred ewes Scanned in lamb to retain as future breeding ewes or trade options.
