Assessor Comments	400 x 460 115% lambs at foot. Lambs are fresh and sappy and growing well, showing very good weight for age, born over a tight lambing from 01/03/21 until 07/04/21. Ewes are typical Queensland types and plain bodied uncomplicated ewes. Ewes were mouthed sound/ worn prior to lambing and again at marking. I would suggest that these ewes would be well worth another lamb as some are only just fresh full mouths. All the hard work has been done here! The ewes have a good start in the skin and the lambs are marked. Within the ewe mob some ewes have the normal blemishes a ewe of this age can develop. There's an odd long toe and the odd ewe missing an ear etc. lambs are given in and lamb count is accurate at assessment but noted as approximate for delivery reasons.
