			Good	20%		
Assessor Comments	Quality line of scanned in Highlander X Ewe Lambs. Scanner did not do multiple scanning but predicted a high number of multiple lambs. Ewes should commence lambing 20 July for a tight 4 week period to PLG White Suffolk Rams. Highlander's were developed 20 years ago to achieve a uniform, moderate mature size ewe, with selection on lambing ease, lamb survival, milking and mothering ability to deliver more kilograms of lamb weaned per hectare.
